A file name is preferably composed by: Last name of the photographer_first name_serial number (Smith_John_01)

The file name of the photos should consist of a maximum of 32 characters and should not contain any special characters with accents, commas, umlauts, dots, tildes, etc. and therefore no non-Latin characters, only aA-zZ and 0-9

Follow this advice strictly to avoid uploading problems

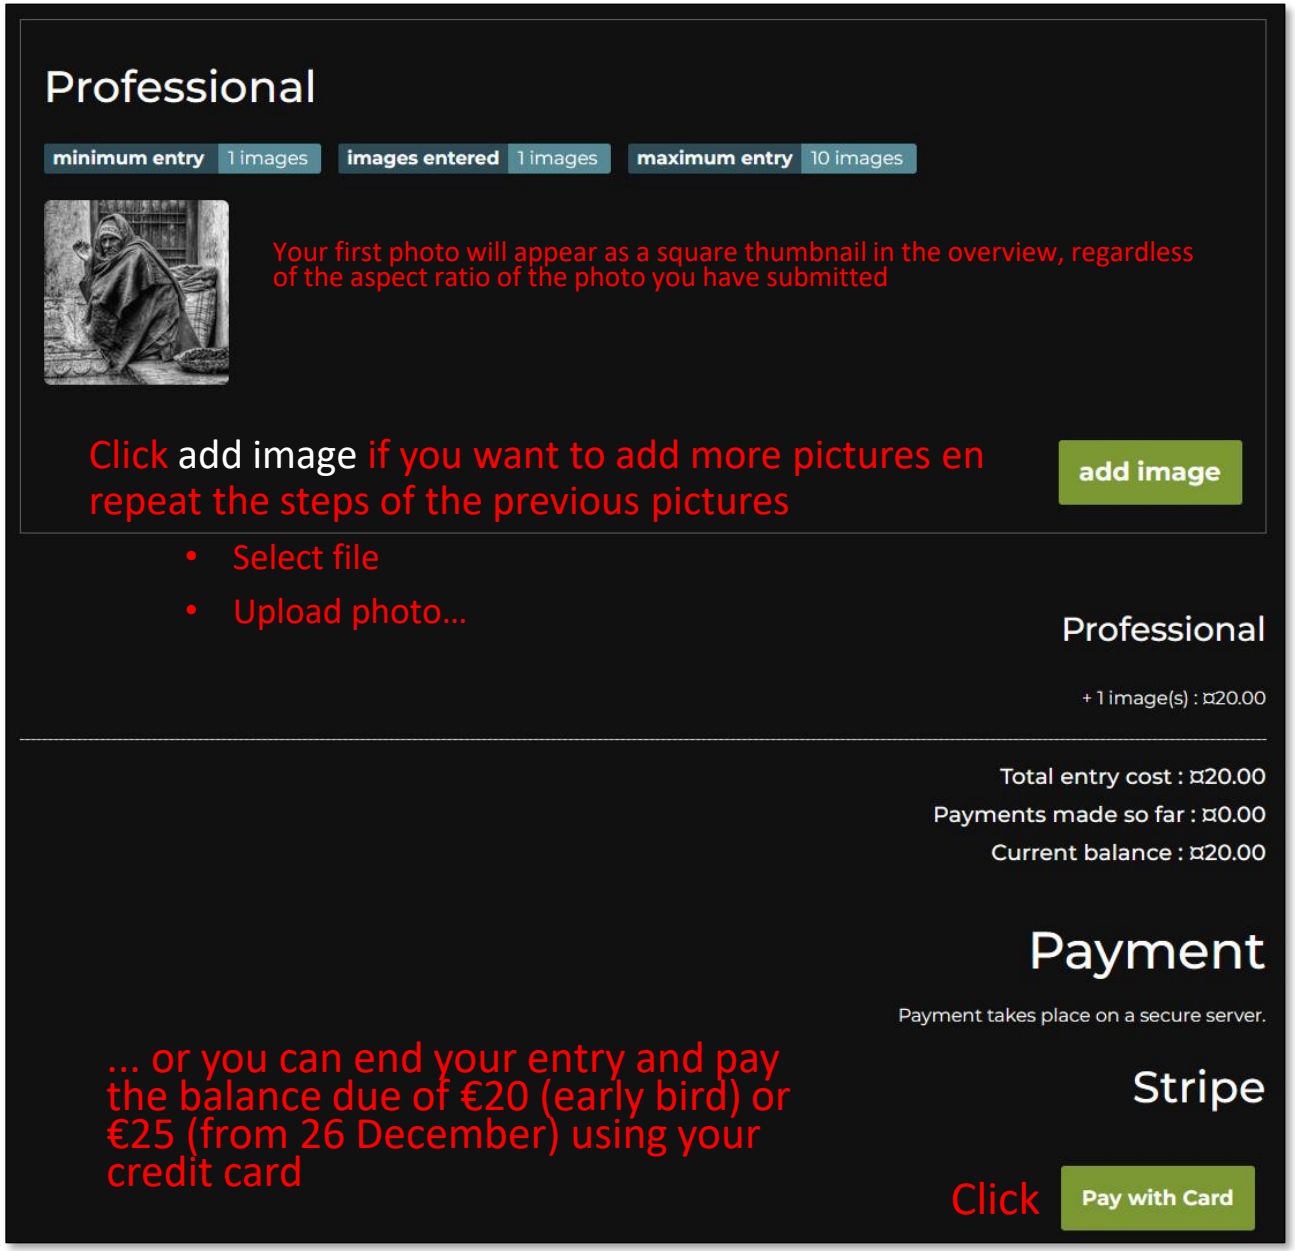

The selected file name appears in the selection window. Click upload image.

Upload pictures

If a thumbnail of your photo is not displayed, but instead an icon like this  then the upload has failed because the photo does not comply with the rules.
This may be due to:

- a pixel size greater than 100 MP
- an invalid file type (must be jpg)
- longest side less than 4000 px
- file size greater than 40 MB
- file name too long or contains special not permitted characters
- another reason
